Thanks, Brad.  
Will look this over and let you know if we need any changes.  
The data table or data figure will be published on our web site.  
Carolyn

Carolyn

Per our discussion yesterday, please find attached the pdf version of the chart with the Draft watermark removed. I also added a footnote regarding the predominant wind direction observed prior to and during the test. I have also attached another copy of the 3<sup>rd</sup> party data validation report and the corresponding Pace laboratory report.

Please let me know if you need anything else.

Sincerely,

Bradley E. Gentry, LPG

No, that was it. Just wanted to get everything to Carolyn that she needs so we're not holding up any information release to the public. We would rather direct inquiries to the EPA website rather than answering any direct questions about results.

Joe

Is the chart you are discussing, the updated ambient air analytical results? If so, yes we have supplied that information to her for their records, along with the 3<sup>rd</sup> party validation report. If there is something else you are referring to, please let me know.

Brad - have we supplied Carolyn with the updated chart we looked at yesterday? We're hearing that CBS will be putting out a report that makes it seem like we're holding up the process.

Carolyn - can we expect to see the chart and/or actual results posted on the EPA website? When do you think that would happen? Thanks.
